MIA XR COLLECTIVE PITCH · ROME · 22 OCTOBER 2026

Old Stories, New Doors

What five winters of *A Christmas Carol VR* taught us about classic IP

Alex Coulombe
CEO, Agile Lens: Immersive Design

YOUR SPEAKER

Alex Coulombe

Founder & CEO, Agile Lens: Immersive Design

Architect turned XR-chitect who has spent the last decade building spatial experiences for the world's most ambitious clients.

Authorized Unreal Engine instructor since 2020: 300+ classes taught, 40+ courses written.

BOOTSTRAPPED · XR SPECIALISTS · 10 YEARS

ACT I · 1 / 4

Every Beloved Story Hits the Same Ceiling.

The run ends. The season closes. The house only has so many seats. The audience that loves it is getting older, and the next one needs a new way in.

Classic IP needs new audiences and new revenue beyond the stage and the screen.

IP VALUE · AUDIENCE DEVELOPMENT · NEW REVENUE

ACT I · THE CEILING

It Started as a Small Ask

Originally produced in association with Actors Theatre of Louisville · 2021

- Actors Theatre of Louisville asked us for production assets: digital characters and some video.
- We came back with a bigger idea: a full live production of *A Christmas Carol*, in VR.
- They said yes, then gave us their blessing to remount it every year.

ACT I · THE CEILING

A Christmas Carol VR

Live actors. Live audiences. One shared virtual stage.

- Live actors with face and full-body capture perform on the streets of a virtual Victorian London
- Fully remote: actors, crew and audience each join from wherever they are
- Five holiday seasons, 2021–2025 · The final run, December 2025: 15 performances

A Christmas Carol VR 2025 trailer · Agile Lens

ACT I · THE CEILING

How Audiences Experienced It

Not watching a story. Standing inside one.

- Eye contact: the actor sees you, and plays the scene to you
- AI Dickens, a digital host voiced with the lead actor's permission, welcomes guests before curtain
- After the show, a live Q&A with the actors

A Christmas Carol VR · Agile Lens · performed live by Ari Tarr and Debbie Deer · adapted by Robert Barry Fleming

In Their Words

Raindance Immersive 2025 nominee, Best Immersive Theatre · Audience comments as published on xmascarolvr.com, 2021–2025

"WOW doesn't even come close to describing what I just experienced! I haven't enjoyed 'A Christmas Carol' this much in years."

Robert Copelan, audience
xmascarolvr.com · 2024

"Each year, Agile Lens is like pushing the edge for what's next."

Kent Bye
Voices of VR podcast · 2025

"A Christmas Carol VR is a masterclass in acting"

Raindance Immersive 2025 judges
as quoted on xmascarolvr.com · 2025

"We're extremely curious to see what Agile Lens and their creators do next with theatre in VR"

Ian Hamilton
UploadVR, editorial · 2025

"I sat on that bench and looked up at Scrooge... and [he] emotionally spoke, of me... It felt remarkable!"

Chuck Webster, MD, audience
xmascarolvr.com · 2024

"This was a working glimpse into the future of VR as a medium for Real Time Live Production."

Jimmy6DOF, audience
xmascarolvr.com · 2021

"It was fascinating to see the affordances of VR used in this way. I'd love to see more VR plays done like this."

Claren Naïlo, audience
xmascarolvr.com · 2024

"Agile Lens represents a model of artistry that transcends mediums and time zones alike."

Siobhan Greene, Instinctively Real Media
the show's media sponsor · 2025

"The evolution of this show over the years is remarkable and the performances are top shelf!"

Stephen Butchko, audience
xmascarolvr.com · 2025

"Quite enjoyed catching the opening night of this. The world needs more live VR performances!"

Nick Suda, audience
xmascarolvr.com · 2025

ACT I · THE CEILING

What It Proved About Classic IP

Five winters, three lessons

- A story audiences already love lowers the barrier to a brand-new format
- A live show without a building: the house can be anywhere
- The value outlived the run: characters, sets, an AI host and live-performance tools we reuse

Replay recording of a performance · Agile Lens (Yu-Jun Yeh)

ACT I · THE CEILING

The Run Ended. The Performance Didn’t.

Our replay and film tools, and a December return

- Performances recorded with their motion capture, cues and spatial audio
- Replay from any position, on a scrub timeline: review it like dailies
- A cinematographer build shoots new camera coverage of a show that’s already over: see it in our demo area
- Back this December: the full live show as a replay, not a video, that audiences join together from headsets. Dates to be announced.

One Performance, Four Lives

Click a stop, or drag the playhead

DECEMBER 2025

Live in VR

Actors and audience together: 15 performances

EVERY SHOW

Recorded as data

Motion capture, cues and spatial audio. Not video.

AFTER THE RUN

Replayed and reshot

Any seat in the house; new camera coverage

DECEMBER 2026

Joined together

Attendees join the replay from headsets. Dates TBA.

Two Ways XR Works for Film.

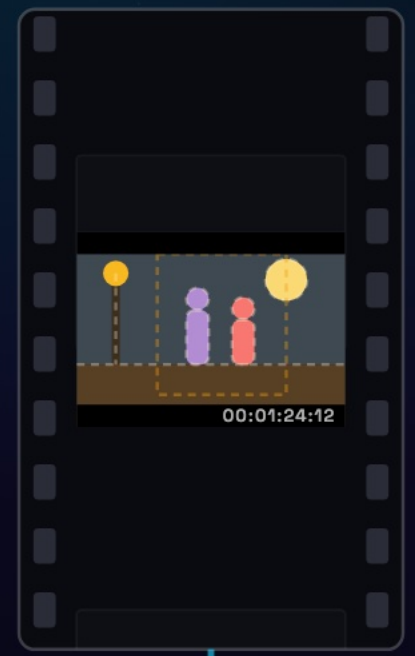

Inside the pipeline, where the result is still a normal film.
Or as the product: a new edition that takes the story further.

XR Inside a Normal Film Pipeline

The crew uses the headset. The audience gets a normal film.

PRE-PRODUCTION	PRODUCTION	POST-PRODUCTION
Scout a scanned location in VR	Rehearse actors in the virtual set	Shoot new coverage from recordings
Try lenses, lights and blocking at 1:1	Capture performance onto digital humans	Reframe with a virtual camera
Pull stills into the shot list	Real-time previs and virtual sets	Review in VR, like dailies

XR for the crew

● Agile Lens has built this ○ What XR can do

A normal film. Any screen.

What the Crew Sees

Click a phase. None of this ends up on screen.

Pre-production | Production | Post-production

- Shoot new coverage from a recording
- Reframe with a virtual camera
- Review it like dailies

Agile Lens: A Christmas Carol VR replay and cinematographer builds

Scan the Real Place. Walk It Before You Fly.

Gaussian splats: a photoreal capture of a real location you can stand in

- Capture a real place in minutes, with a phone or a scanner
- Photoreal, view-dependent detail at human scale
- Walk it in VR at 1:1: scout, block, try lenses, plan shots
- Share the space with a remote director, DP or producer
- Reuse it as a virtual-production backdrop or set extension
- Lighter than a photoreal mesh; cheap to re-scan when the place changes

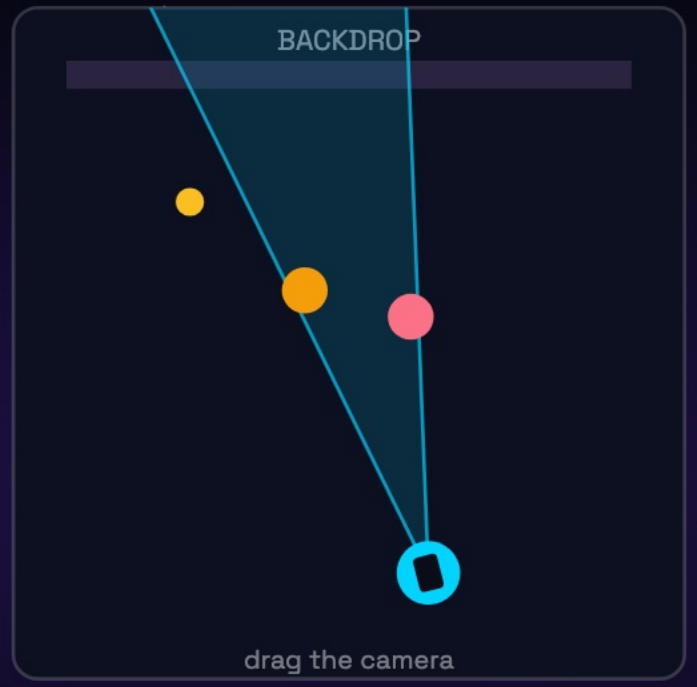

● Agile Lens has done this ○ What a splat can do

Find the Shot Before You Fly

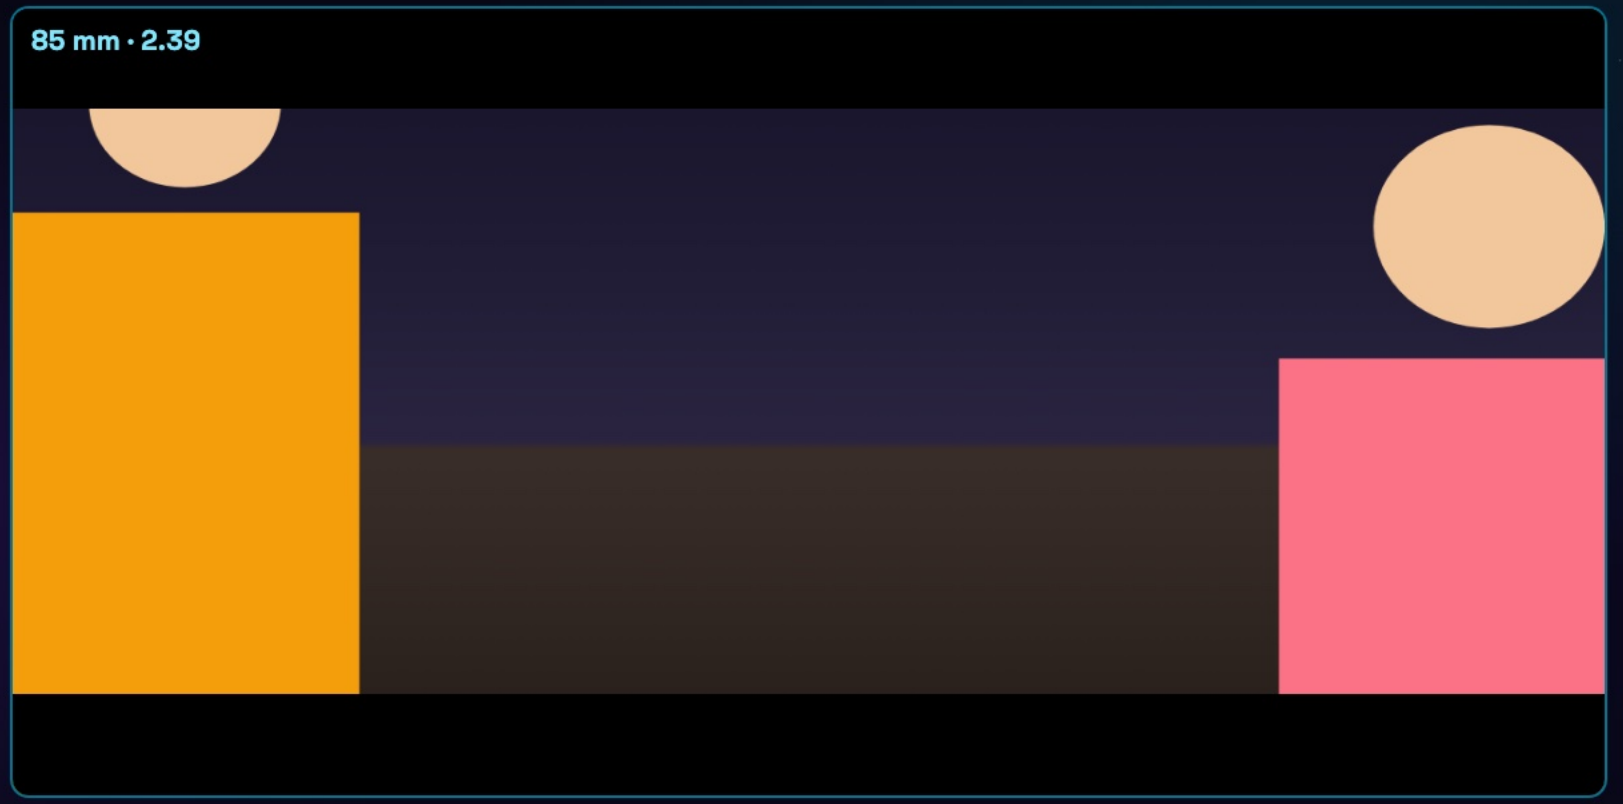

Drag the camera. Pick a lens. Take the shot.

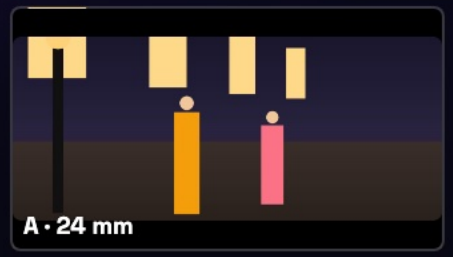

CONCEPT DEMO, BUILT FOR THIS TALK

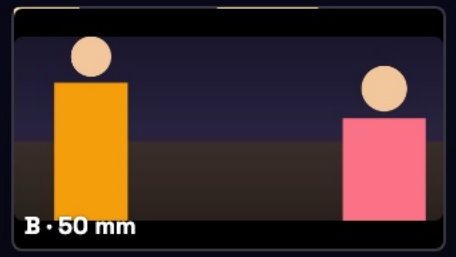

24 mm | 35 mm | 50 mm | 85 mm

2.39 mask | Take shot

Cut Your Own Version of the Show

At our table today: a prototype built overnight for MIA

THE RECORDING

The full show, recorded

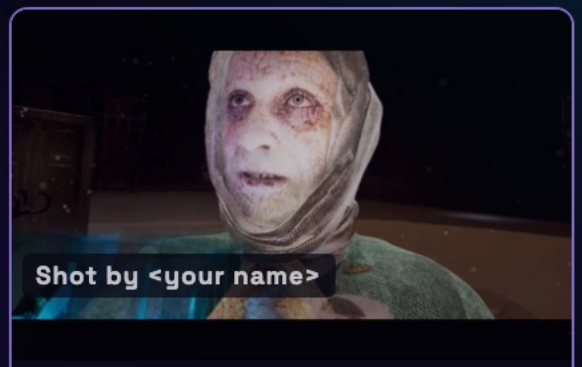

Laptop and gamepad, offline. Default scene: Dickens and Scrooge

YOU

You are the camera operator

Fly a virtual camera through the performance; 24, 35, 50 or 85 mm

YOUR SHOT

Your shot, credited

Add or replace a shot anywhere in the show

A NEW CUT

A new cut of the whole show

Plays back in 2.39 with a WORKING CUT title card; survives a crash; exports

Recorded show — Your camera — Credited — Working cut

XR Network+ RSC Challenge 2025 film · Agile Lens

ACT II · TWO WAYS IN

Royal Shakespeare Company

Virtual rehearsal tools, developed with the RSC

- Actors rehearse in a 1:1 scan of the Swan Theatre; directors follow along from a laptop
- Built with theater people, for theater people: the script stays in your hand, like paper
- An R&D grant with XR Network+, 2024–2025: tested with drama students, shown in Stratford

Same Rehearsal, Two Rooms

Drag the line

What Stays Normal

The audience gets a flat film. Any screen, any cinema.

A Christmas Carol VR · Agile Lens · performed live by Ari Tarr and Debbie Deer · adapted by Robert Barry Fleming

XR as the Product

One story, more doors, each built on what only XR does

ONLY XR

- Presence
- A shared audience
- Your own viewpoint

ONE STORY

A Christmas Carol

● Live in VR

Actors perform live;
the audience stands inside

Carol, five seasons, 2021–2025

● Trailer and clips

Flat video that sells it
on every screen

Carol 2025 trailer

● Replay, together

The full live show replayed;
attendees join from headsets

Carol, this December · dates TBA

○ Phone & web teaser

A taste on any device,
no headset needed

○ Festival circuit

Immersive sections at SXSW, Venice,
Cannes, Tribeca: a second audience

Carol: Raindance Immersive 2025 nominee

● Done with Carol ○ An open opportunity

ACT III · 3 / 4

The Same Model, Other Stages.

Live performance, venues, homes and flights: audiences stepping inside.

Heavenue

The cloud platform we built for live performance in virtual space

Lincoln Center · David Geffen Hall

See the view before it's built.

VR models for seating, sightline and railing decisions in David Geffen Hall's redesign, with Fisher Dachs Associates and Diamond Schmitt Architects

Four Seasons Private Residences, Lake Austin

In-headset capture · with DBOX and Pureblink · Agile Lens, LBE VR technologists

eVTOL air-taxi passenger simulation

Take the flight before it exists.

A passenger-flight simulation for an eVTOL air-taxi company: a ride over New York

ACT IV · 4 / 4

What Kind of Partnerships Are We Looking For?

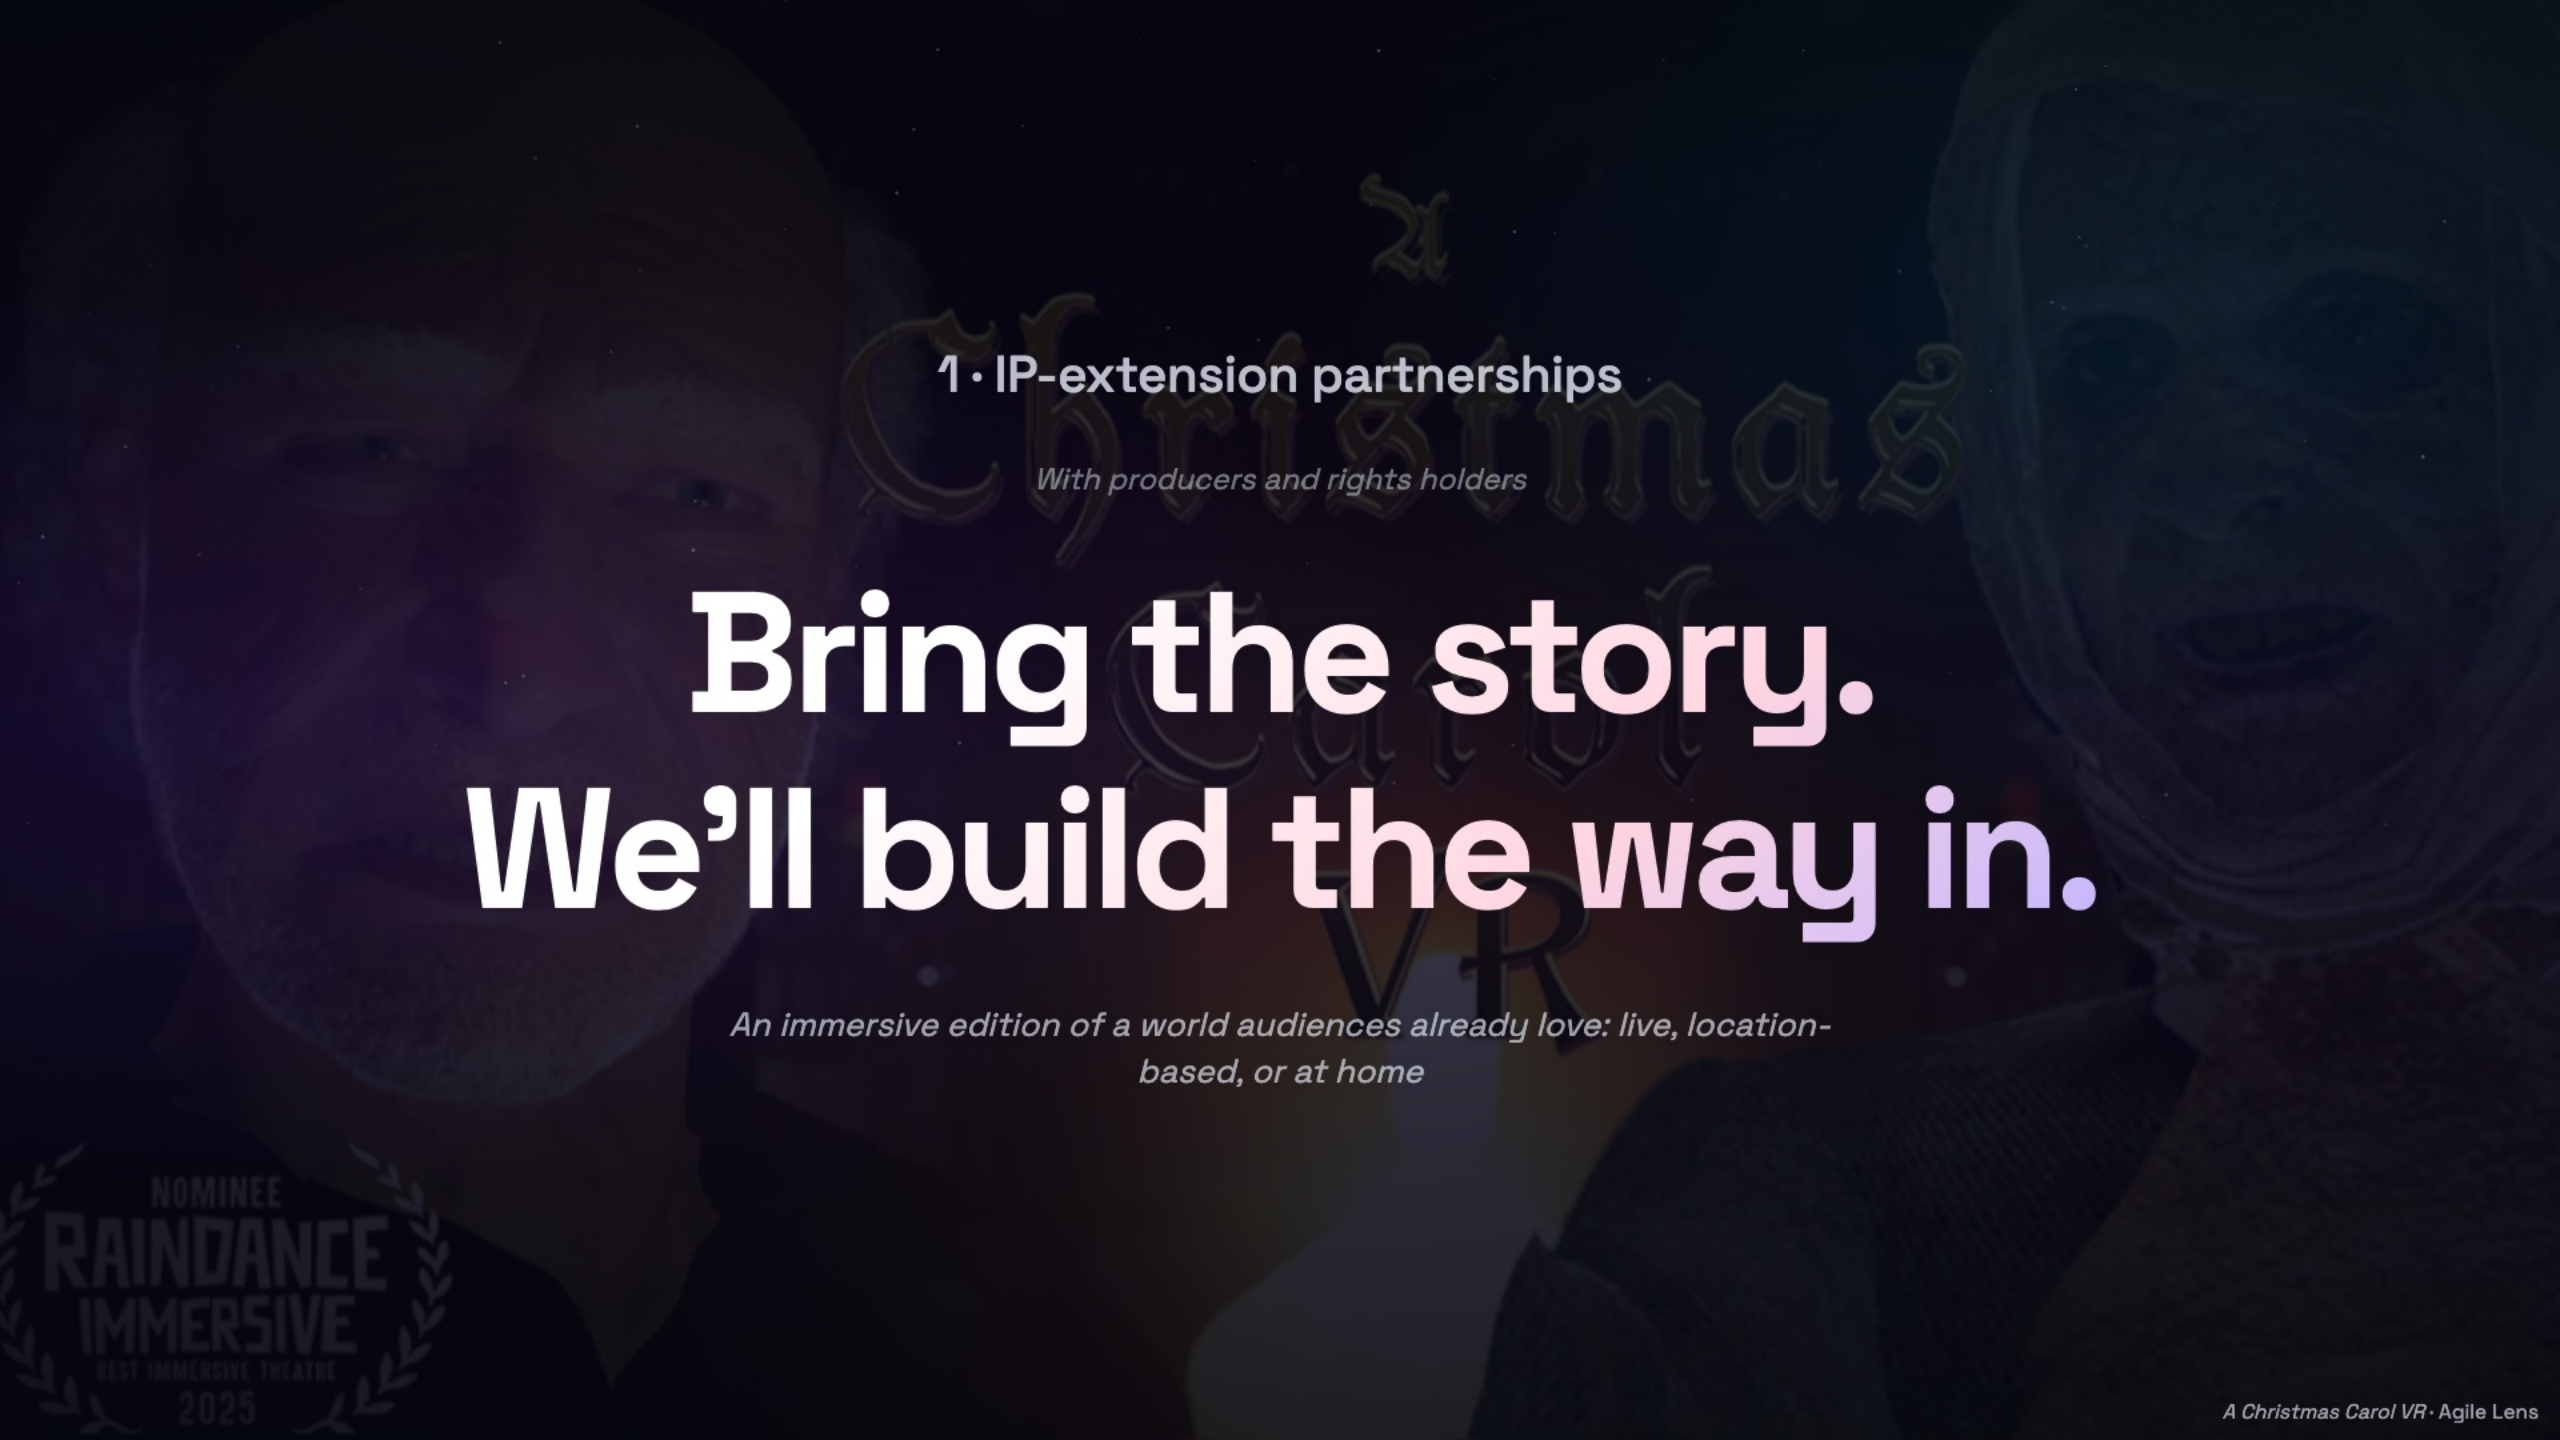

Two kinds. Both start with a story you already own or produce.

1 · IP-extension partnerships

With producers and rights holders

Bring the story. We'll build the way in.

An immersive edition of a world audiences already love: live, location-based, or at home

2 · Co-productions from day one

Immersive inside the financing and distribution plan

In the plan, not bolted on after.

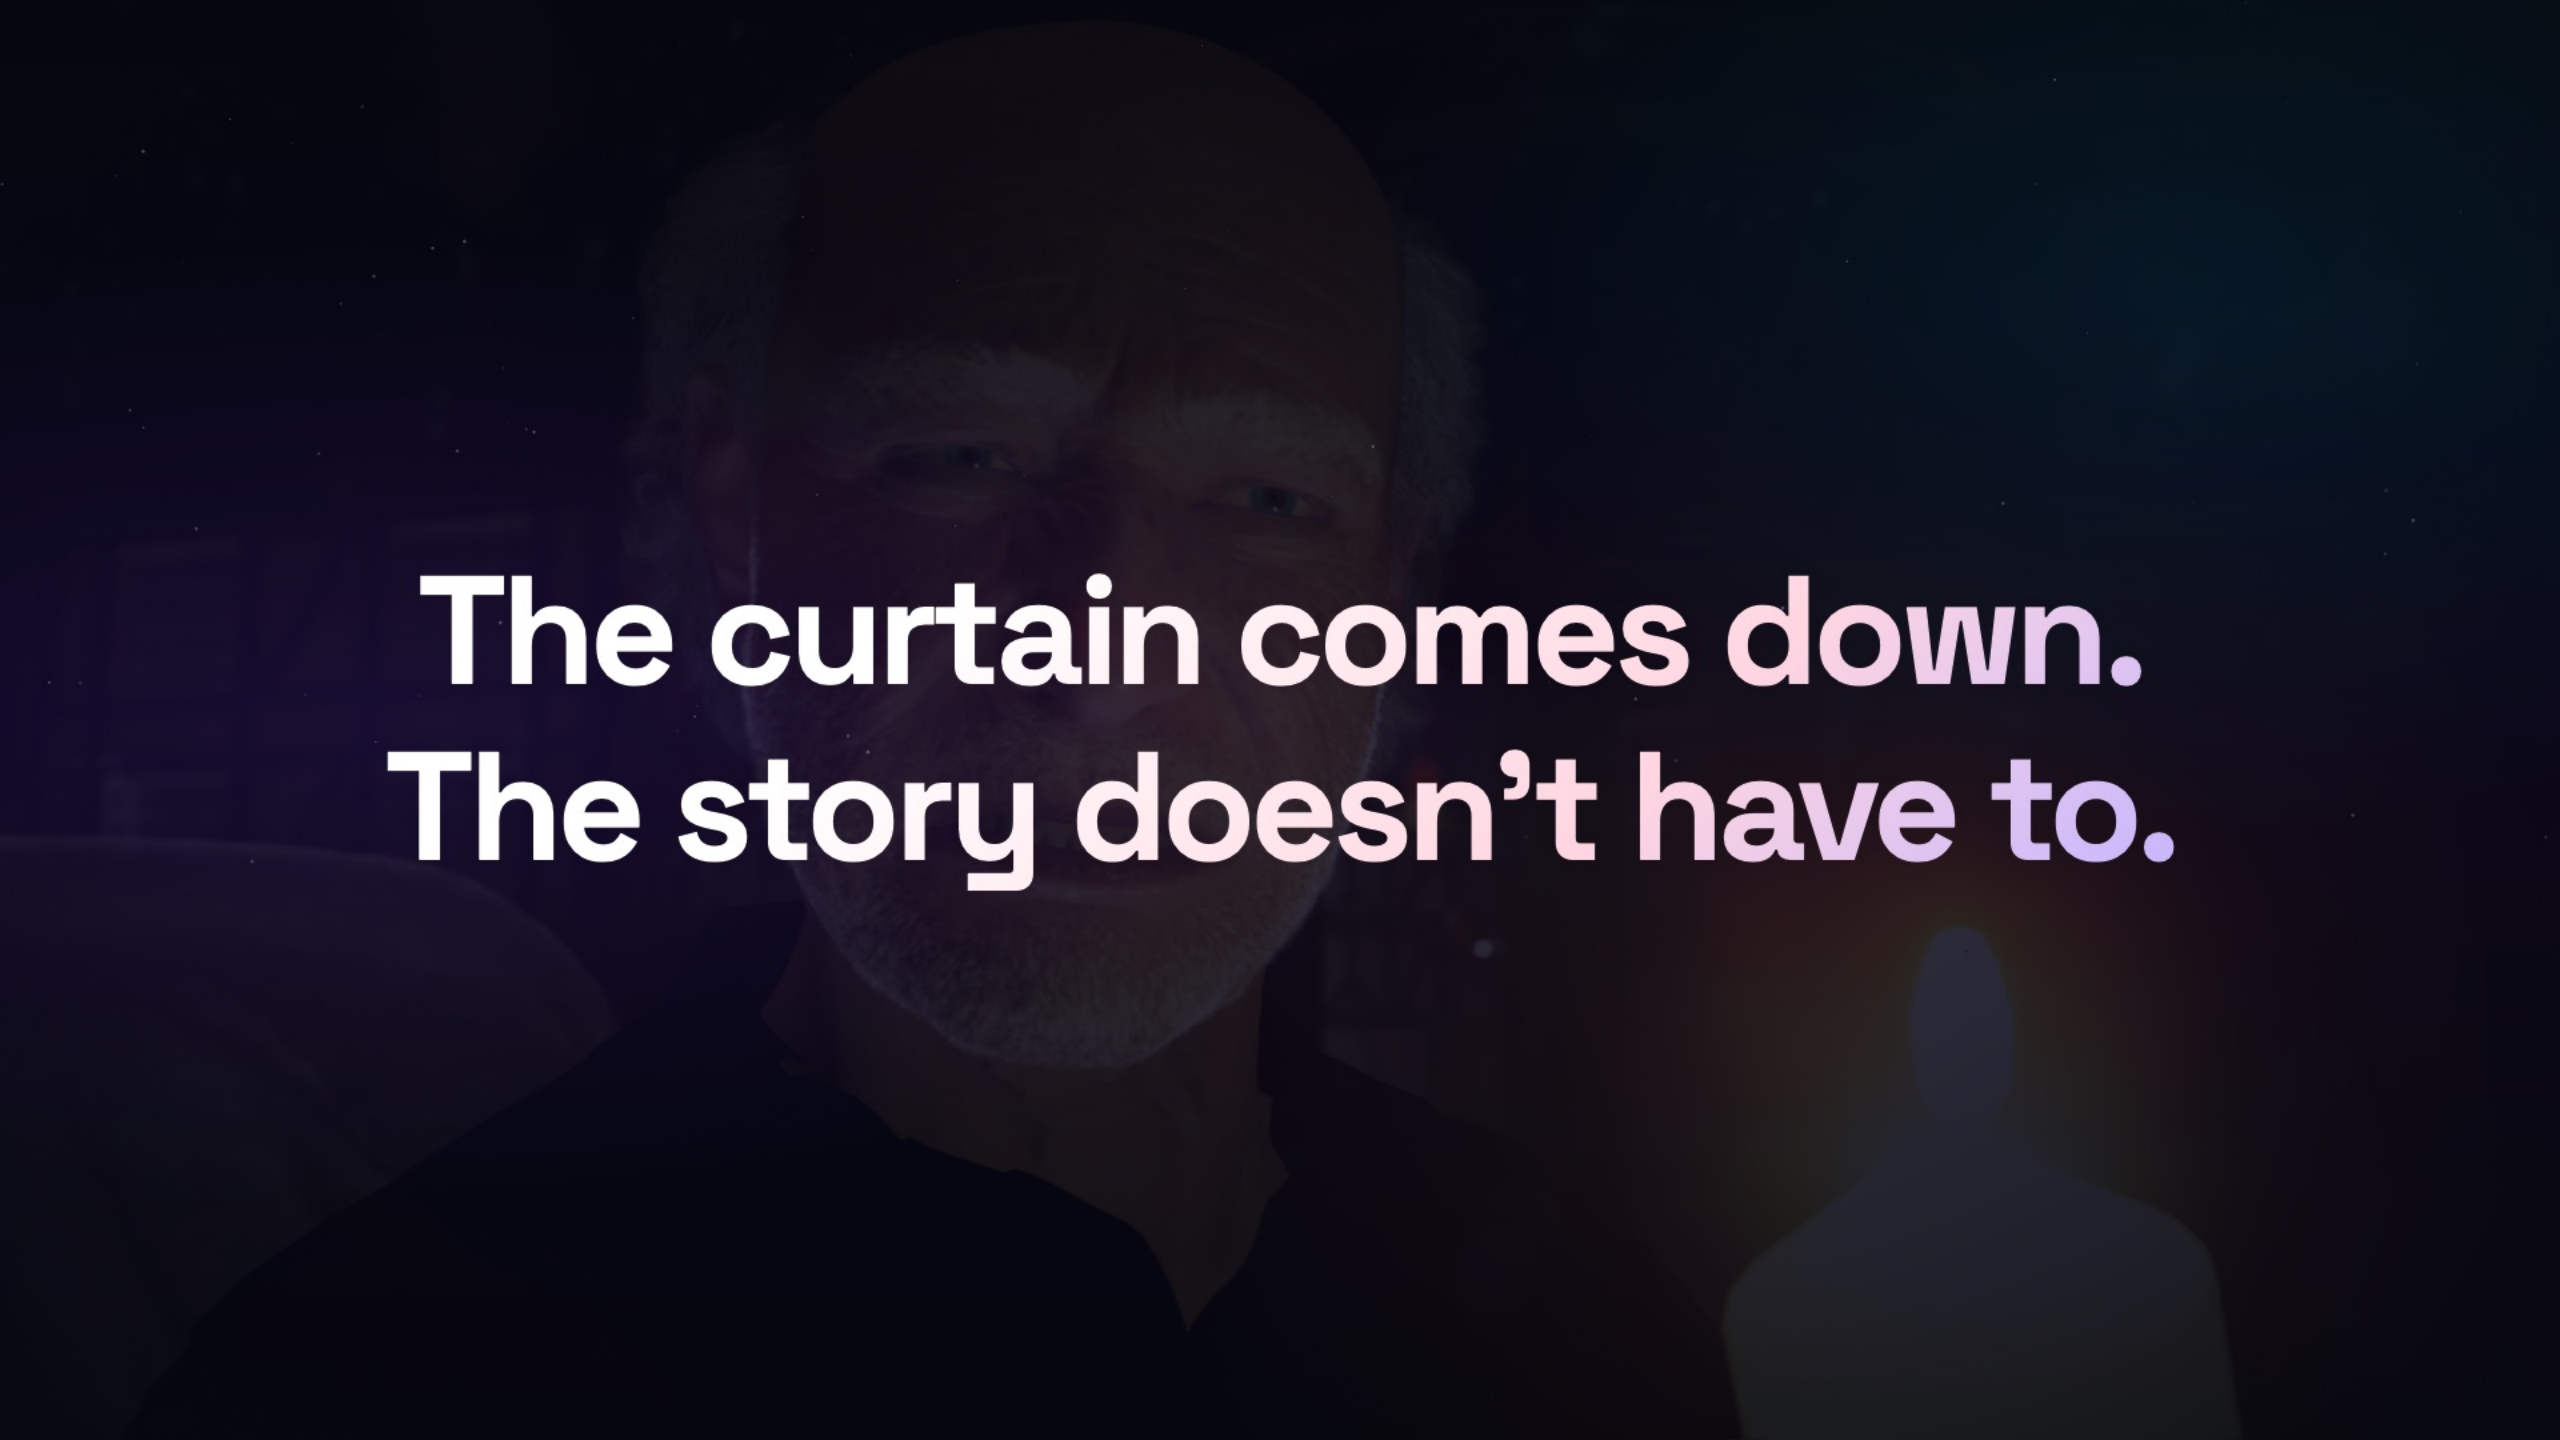

Budgeted with the production: new windows, new audiences, assets that carry across formats

RSC rehearsal R&D · Agile Lens

How we start

One story.
One audience.
One prototype.

A short, paid prototype of a single audience moment, then a production plan you can finance

The curtain comes down.
The story doesn’t have to.

GRAZIE

Let’s Build the Way In.

IP-extension partnerships · Co-productions with immersive in the plan from day one
